

Compatibility Smoke Test Report

ThirdFort — Mobile App v.4.7.6 | New OS platforms: Android 17 & iOS 27 Beta | Iryna Tkachenko | 17 Jun 2026

Outcome: Build runs on both new OS platforms; core flows stable.

The purpose of this run was to validate App v.4.7.6 against the new OS platforms **Android 17** and **iOS 27 Beta** on BrowserStack. Two smoke runs covered the core CDDP Purchaser journeys (Authentication, Identity, Personal Details, Proof of Address, Source of Funds, Ownership). 29 of 34 executed test cases passed. 4 cases were skipped due to a BrowserStack limitation (Onfido not available), and 1 case failed on Android linked to defect CDD-6530.

Scope & Environment

Run	Platform / OS	Device	Build	Env.	Result
TR-16	Android 17	Google Pixel 9	4.7.6	Sandbox	14 passed · 1 failed · 2 skipped
TR-15	iOS 27 Beta	iPhone 15	4.7.6	Sandbox	15 passed · 2 skipped

Goal: The focus of this cycle was OS-compatibility — verifying that App v.4.7.6 installs, launches and runs the core journeys correctly on the newest OS versions (Android 17 and iOS 27 Beta). All testing was performed on **BrowserStack**, on the **Sandbox** environment.

Skipped cases (BrowserStack limitation): **TC-25** (Successfully complete ID check with Passport) requires the Onfido SDK, which cannot be completed on BrowserStack. **TC-35** (Upload multiple files... — Proof of Address) is triggered only after the Onfido step, so it was also blocked. Both were skipped on both platforms.

Note on the failure: **TC-4** (View transactions list) failed on Android — see Defects below. The underlying defect **CDD-6530** was originally spotted on Production, not in this Sandbox run.

Defects

ID	Summary	Linked TC	Priority
CDD-6530	Transactions list shows cancelled/closed transactions from other devices — only new and device-relevant transactions should appear.	TC-4	Medium

Detailed Results — TR-16 · Android 17 · Google Pixel 9 (Sandbox)

TC	Title	Section	Status
TC-1	Login with phone + access code	Authentication	Passed
TC-4	View transactions list	Transactions list	Failed
TC-8	Complete personal details task	Personal Details	Passed
TC-13	Complete current residential address task via address search	Current residential address	Passed
TC-19	Skip passport task and confirm identity another way	Passport check	Passed
TC-25	Successfully complete ID check with Passport	Original ID	Skipped
TC-35	Upload multiple files of different formats and sources	Proof of Address	Skipped
TC-40	Complete task with single document (happy path)	Complete ownership verification	Passed
TC-48	Successful logout	Account Management	Passed
TC-56	Sections list displays correctly; Sources locked until Transaction details completed	SoF / SoF Intro & Skip	Passed
TC-59	Transaction Details – Complete via address search (happy path)	SoF / Transaction Details	Passed
TC-62	Add bank account via Open Banking (Mock Bank)	SoF / Bank Statements	Passed
TC-68	Unemployed (status only, no income fields)	SoF / Employment Details	Passed
TC-76	Declare no additional income via "I don't receive anything else"	SoF / Additional Income	Passed
TC-83	Complete with no co-purchasers via "No"	SoF / Co-purchaser	Passed
TC-89	Sources intro and Purchase funds screen display	SoF / Sources	Passed
TC-90	Add multiple sources and verify Funds required recalculation	SoF / Sources	Passed
